

SPS-HD-SRX	
Material	316L
Compatible with	SRx (SRV and SRD) -HD-X5
Spare parts included	M2 Bolts (x4)

Use of this accessory may lead to plugging of the sensing element, care must be taken to only use where plugging risk is low, ideally in low viscosity environment where fluid transfer is high. Only use when there is a risk of damage due to external surfaces hitting the sensing element.
